

Questions from Low-Mod Area Benefit/Survey Presentation – March 16, 2021

Q1: Would construction of a helicopter/medevac pad at the local volunteer fire department qualify?

This would be a very hard project to qualify. The project must serve a Low Mod area and a helicopter serves a very broad area. You would have to prove that the entire service area of the helicopter pad is a Low Mod service area. This project would be very difficult.
